

Milford Pop-Up Overview

LIVING LAB RESEARCH GROUP

Who is Living Lab?

Living Lab is a DelDOT-supported interdisciplinary research collaborative between the Biden School, the Landscape Architecture Department, and the Institute for Public Administration at UD.

It was designed to assist Delaware local governments and community organisations in planning, executing, and evaluating pop-up demonstration projects. It seeks to catalyze community-driven , pop-up demonstration that test viability of long-term infrastructure improvements and placemaking initiatives.

Quick Pop-Up Facts

- The Pop-Up will be up from **June 11 to July 2**
- It is meant to test elements of the **upcoming transportation plan** for the city of **Milford**
- All interventions are meant to **make multimodal transport (like biking) easier**
- **It will not impact the flow of traffic**
- **It will impact parking on the east side of Marshall Street**

Materials

We will use QwickKurb to outline the bumpouts and medians. It is temporary and collision-tested, and is not adhesive.

For the crosswalks and center line, we will be using tempera paint. It is environmentally friendly (ingredients water, pigment, and egg whites) and washes away with rainwater. The chalk paint lasts a few months, and the tempera lasts a few weeks.

Thank you!
